Minimise loss.

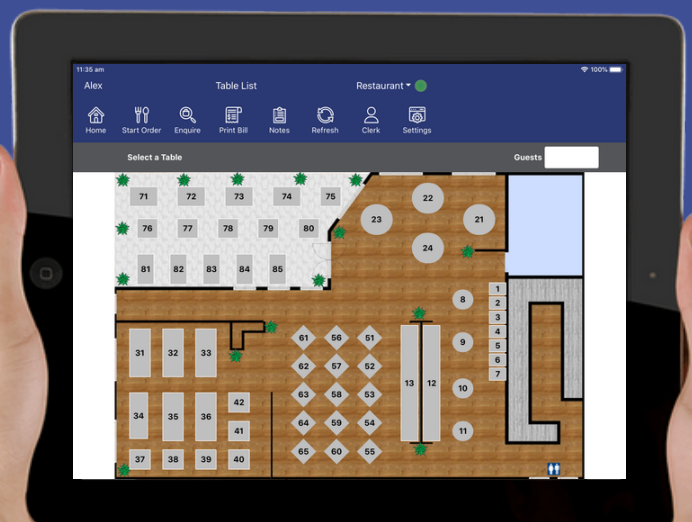

Streamline your operations with our key management features.

- ✓ Stock management and tracking
- ✓ Know your numbers with intelligent reporting
- ✓ Staff management, clerk security and audit logs

Maximise profit.

Work smarter, understand customer behaviour and increase spend.

- ✓ Customer promotions and loyalty
- ✓ Self service devices, ordering, pay@table and EFTPOS integration
- ✓ Customer relationship management and favourite transaction

SELF SERVE KIOSK

The Kiosk is configured just like a standard POS terminal and supports customer loyalty, EFTPOS integration and all features that are available in the POS.

MOBILE ORDERING APP

Idealpos has developed a handheld app for Apple iPhone, iPod and iPad devices to allow staff to offer more efficient service to customers on the floor. Offering advanced capabilities to place an order quickly, or allowing the customers to place their own order, this is a time saver in your pocket!

STOCK MANAGE APP

Perform a stock-take on all your locations, transfer stock between locations, receive items into stock and assign barcodes to all items.

TABLE MAP

Provides a graphical user interface to view at a glance the status of all tables within the establishment. The table map is completely customisable and can facilitate the configuration of many different functions. Each colour represents a different status for the table.

KITCHEN MONITOR

Allow kitchen staff from anywhere in the kitchen to view the order and help keep service moving at a fast rate.

CLOUD REPORTING

Access your reports online, anywhere, anytime. All you need is a smartphone or tablet with an Internet connection to keep tabs on your daily takings, KPIs and compare your selected period's performance to previous equivalent periods.
